## Introduction

Elam International, one of the leading business groups of the region, incorporates multiple fields under one roof. Ei has developed a pro-active and professional range of businesses and entities that value our stakeholders, strategic partners, investors, and the Ei team as a whole. Our operations transcend across numerous business segments including Information and Communication Technology, Construction and General Contracting, Distribution, Electronics Maintenance Workshop, Medical Technology, Trading, Logistics, Fashion, Manufacturing and Education.

Building strong partnerships underlies Ei's success. Ei's robust and empowered management team makes it distinct and affordably flexible when it comes to the requirements of businesses. Ei holds diversity, together with many expertise and skills, having a team technically and administratively qualified, endeavoring for excellence in what they do, by delivering the best standards.

Ei as a group, including different companies, has delivered multiple projects in their respective fields. The government, banking, national switch, health, education, International NGOs, private businesses and telecommunication are the major sectors we have served in IT. In construction, we have worked for Afghanistan National Army, ISAF, GOA, USG, USACE, NATO, US Navy and RS in large scale projects. We provide medical tourism, as well as Real Estate Services in Turkey, Brazil, Russia, India, Malaysia, UAE, Saudi Arabia, Oman, China, Thailand and Philippines and Iran. Our fashion trading includes branded ladies and gents wears from different countries in commercial market, as well as a well-equipped factory for production of uniforms and outfits.

Ei has developed standard strategies and implementation criteria to deliver quality and excellence in all the projects. We maintain our standards, along with initiating new business opportunities for the investors who seek new paths for investing in the region.

## **Mission Statement**

The mission of EI is to involve stakeholders in large scale business in order to provide quality services and address all the requirements of the market in our domain.

## **Vision**

Our vision is to expand our role as world class market leader in our domain by maintaining standard of quality.

# Team

## Group Chairman

Akmal Elam, the Group Chairman of Elam International, is a young talent with more than 15 years of consecutive experience in the field of Information and Communication Technology. He leads the project team, administration and budgeting of the group. He has been one of the pioneer team members of CPA. He speaks Pashto, English, Persian and Hindi fluently.

### Quality Assurance Advisor

Zaheer Bawar, Canadian National with a BS in Information Technology and Masters in Software Quality Assurance from Ottawa, Canada, is the Technical Advisor of Ei and heads the overseas business too. He is a talented young man with 15+ years of experience in System Automation and Solutions Architecture. He is the pioneer to introduce, design and implement the National Banking Switch (APS) of Afghanistan. He has designed and implemented various automation projects in Afghanistan as well as in Canada. He is fluent in Pashto, English and Persian.

### General Manager

Abdul Wahab Elam, a Software Engineer by profession, is the General Manager of Ei. He has BCE from Afghanistan, with years of experience in team management and business development. He has a number of certificates in Management from Europe and Afghanistan, where PMP is worth mentioning. Mr. Elam has managed one of the most critical portions of eNID. He has delivered multiple successful projects to the clients including government sector and NGOs. He is Pashto native and speaks, writes and understands English, Persian and Hindi.

### Administrative Auditor

Sahar Sadat is the Administrative Auditor of Ei. She has an Advanced Diploma in Finance from AAI and BBA from Rana University. She did her first project in Ministry of Finance in HR and Treasury Directorates. She has more than 5 years experience managing the accounts and books of different entities, the administration and HR. She is a self-motivated and enthusiastic person with professional attitude, excellent communication, analytical and problem-solving skills. She is a Persian (Dari) native with excellent command on English and Pashto. She understands and speaks Hindi too.

### Head of BD/Pre-Sales

Farooq Azam, a Canadian National, with a Bachelors Degree in Global Politics and Economics from Canada and a Masters of Science in Global Politics from UK, is the Head of Business Development and Pre-Sales Support. He has more than 10 years experience in business development with national and international entities. A dedicated and professional manager with excellent communication and analytical skills, Farooq has closed a number of deals with the government of Afghanistan. He is English native, with excellent command on Pashto, Persian and Hindi.

**CAD Modeler**

Asst. Professor. Najia Raufi is the CAD Modeler of Architecture and Data Center Departments. She has a BS. Hons in Architecture from Kabul Polytechnic University, along with certifications and courses in Auto CAD, SAP, SAFE, ETABS, REVIT, 3Dhome and MS. Visio. She has worked as Asst. Professor of CAD in Kabul Polytechnic University. She usually speaks on local TV channels as an inspiration to the female Afghans. She was a member of 15th Kabul Polytechnic Students Conference. She is a dedicated person and a professional engineer. She speaks Persian and has good command on English & Pashto.

**Taxation Officer**

Muhammad Akmal Saraj is the Taxation and Licensing Officer of Ei. He has excellent experience of Taxation Law and has been working closely with STO, MTO and CBR, Afghanistan. He has a Bachelor's Degree in English Literature from Nangarhar University with advanced Diploma in Information Technology. He works closely with Operations Department and leads the taxation team in Monthly, Quarterly and Annual Reporting of the BRT, withholding and Income Tax, as well as the Custom Clearance. He speaks Pashto, Persian, English and Hindi fluently.

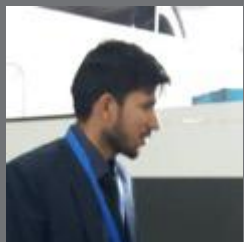

**Workshop Manager**

Mohammad Riaz Saadat, the Workshop Manager of Ei, and the President of SAN is a young talented individual, entrepreneur and professional project manager. Besides being the Hafiz of Quran, he has a Bachelor's Degree in Physics and Mathematics from the Education University of Nangarhar. Beside the technical and administrative management of SanS, he carries out the import of Saadat Fashion, a subsidiary of Ei. He is fluent in Pashto, Dari, Arabic, Hindi and English.

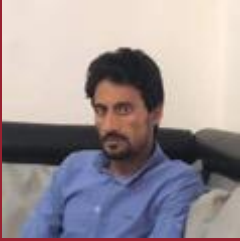

**Administrative Officer**

One of the most senior employees of InteracTech in terms of tenure duration, Nazifa Azghari is the Administrative Officer of Ei. She has been working with InteracTech Solutions since its establishment and has made a very vital contribution to the business and administration. With a Bachelor Degree in Business Administration, she has good communication skills. She faces challenges in the administration and solves them quickly. Persian Native, she speaks English and Hindi fluently.

**Head of Software Development**

Aimal Miakhel, a talented Software Engineer and the winner of DEWA, Sahar Scheme, Afia Siddique and Ibtikar awards, heads the Software Development Team of InteracTech Solutions. With a Master's Degree in Computer Science and Diplomas in Oracle Development, Mobile Applications Development and Web Applications Development, he has over 8 years of experience developing MIS projects for government and non-government entities. He has excellent technical & communications skills and is proved to be a good manager. He is fluent in Pashto, English, Persian and Hindi.

Technical Assistant

Esmatullah Sakhi, one of the oldest employees of InteracTech Solutions in terms of continuous employment, is the Technical Assistant of the Networking Team. He has years of experience in Structured Network Cabling and Cable Management. He finds unbelievable solutions to the paths where cabling seems to be almost impossible. He has done the structured cabling of many Data Centers and has a very good image with all the clients. He supports the procurement team in selecting the type and model of network accessories. He is Pashto native, with elementary command on English and Hindi.

Trade Consultant

Salahuddin Malek Asem, the Trade Consultant of Ei has been leading and supervising different projects since 1999 with National and International entities. He did his schooling from Birmingham, UK and went to Pakistan for higher studies. From Pre-Sales Support up to Signing Off the projects, he leads and supervises each and every activity, follows up the clients and manages the projects on the basis of the schedule and budget. He speaks, writes and understands Pashto, English, Persian and Hindi.

eFlow, a subsidiary of Ei, is an IT Distribution and Supply company that has mainly focused on active and passive network equipment. eFlow was established in 2011 by the Chairman of Ei, with the spirit of taking active part in the rehabilitation and automation process of the government and businesses. As of passive network, eFlow is the authorized distributor of different international brands of Copper cable, Optical Fiber Cable, copper and fiber equipment and accessories. In equipment, eFlow represents Cisco, Dell, HP, Super Micro and Violux.

eFlow is the exclusive partner of Optokon in Afghanistan for both, projects implementation as well as supply distribution of Optokon products throughout Afghanistan.

We offer complete end to end Information Technology solutions, System integration, High-level security products and Turnkey computer based Projects.

ELFA is a leading fashion trader of Afghanistan, registered with government. ELFA is the manufacturer, importer and exporter of gents' footwear under the brand name ELFA. Considering the culture and traditions of Afghanistan, ELFA's professional designers keep the quality, design and age of all shoes in mind and present attractive new designs to the market.

ELFA has active showrooms in Jalalabad, Nangarhar since 2005 as well as in Kabul since 2010, with manufacturing plants in Kabul and India. Being one of the leading suppliers of shoes in the market, ELFA has distributors and sub-distributors all over Afghanistan.

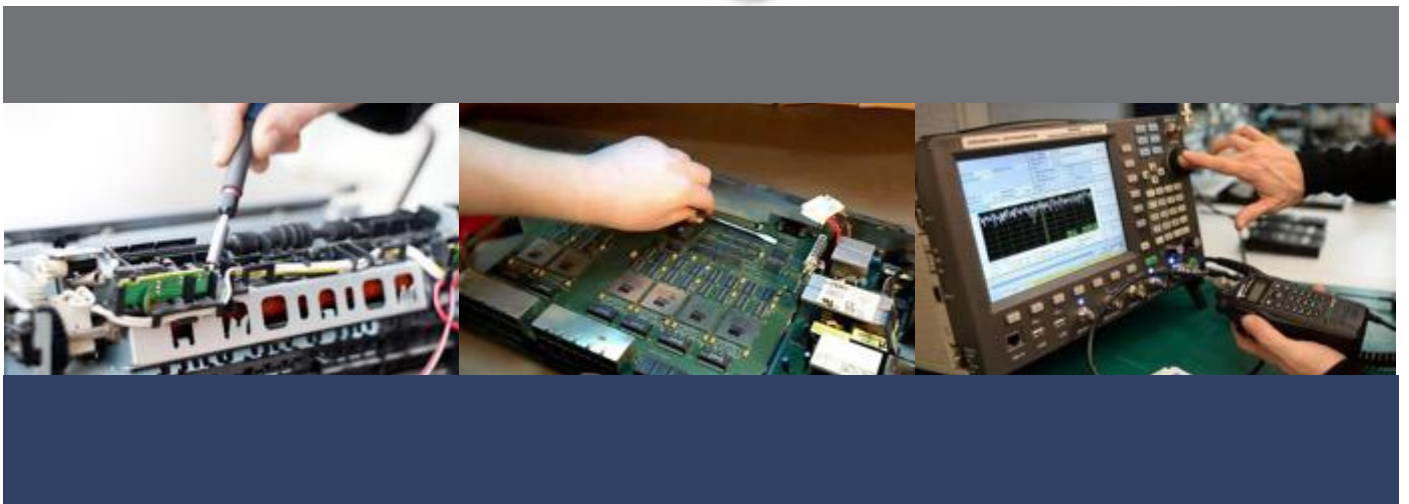

SAN is a locally incorporated company established under the laws of IRA. SAN has been providing electronics repairs and maintenance services, encompassing both the public and private sectors. We help get the most value from the investment of the clients by performing upgrades, repairs, and installations of the hardware and software. SAN focuses on providing complete services and solutions to individuals and businesses in order to maintain productivity and efficiency at its maximum. Our unique work philosophy concentrates on all aspects of repair and servicing of computer systems, printers, copiers, scanners, switches, routers, servers, electronic equipment and wireless devices.

SAN sets new standards in solutions provision through its business model of "Pay by the job - Not by the hour". Using this approach, we are able to cover all aspects of systems repair that are needed without being confined to the restrictions of hourly billing, setting us apart from all its competitors.

mr. IT is a leading information technology solutions provider company established in 2006 in Abu Dhabi, capital of the United Arab Emirates. mr. IT builds, automates, optimizes, and secures businesses with cutting edge technology solutions. mr. IT's strength lies beneath its top of the line quality products, immediate stock availability, and localized after-sales support

**Revolutionizing IT**

Most business cannot wait for critical IT products to be manufactured and delivered after 8 weeks from East Asia! mr. IT shall guarantee short time stock and spare part availability through stocking critical and strategic products.

**Stock Availability**

No one can deny that after-sale support is more important than the actual sale itself when it comes to IT products. Most information technology service providers have geographical limits when it comes to providing support which leads to delays in attending to complains and business discontinuity. mr. IT's business model shall follow a "centralized-sales" "cloud-support" model. This means while sales take place at HQ, support offices and agents are scattered around all over the region to provide immediate technical support.

**Build**

mr. IT builds information technology infrastructure for business from scratch.

**Ethical**

Ethics is a non-separable value of mr. IT personnel. Installing pirated software is not open for discussion, neither is the privacy of customer's data. mr. IT takes ethics seriously.

**Local Support**

Technology is a fast running wheel. mr. IT does not only keep up to date with the wheel but also at-tempts to revolutionize the IT services industry via creative ideas and continuous research and development.

**Automate**

Automation means less manpower and consequently less running cost. When a simple Interactive Voice Response (IVR) can guide the client to the office location why should one pay a secretary?

**Optimize**

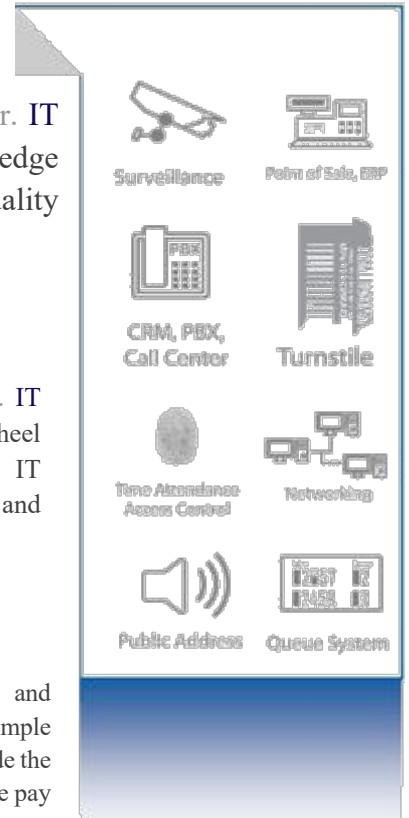

Building IT is not sufficient. It must be flawless and optimized. Who wants a slow network and call -dropping telephone system?

**Friendly**

IT is not friendly by nature. It is zeros and ones! It is in its nature to have bugs and crash all the time! What you need then is a friendly and flexible team of IT professionals to ensure business continuity, away from routine and time-wasting paper work. Sometimes a simple call to mr. IT is enough. Your complaint will be immediately ticketed in the CRM and an agent will attend to you and help you in your own language!

**Professional**

Being professional makes mr. IT deliver highest quality of work and results in maximum punctuality in project delivery.

Afghanistan has stepped into automation and in InteracTech Solutions, We Automate. Automation is one of the most vital needs of the country. Custom Software Development plays an important role in the automation process of public and private sectors.

eSYS is a product of InteracTech Solutions, where we only develop custom software, both solicited and unsolicited. We offer custom software development and consulting services to help you pull off your next project with less stress and less cost. Our team has the technology prowess to power you at every stage of your product development lifecycle, from discovery to ongoing post-launch enhancement with qualified analysts, software engineers, QA and complaint agents. Understanding performance bottleneck and future technology requirement is our edge. Each of our development comes with after sales support and maintenance for time to time upgradation to stay connected with modern devices and digital infrastructure.

ELAM Medical & Tourism Services

## Medical IT

Elam International, together with the strategic partners provide a number of healthcare and medical services through developing automated systems, provision of Telemedicine equipment, Telemedicine Infrastructure design and implementation and customized web and mobile applications for clinics, hospitals, medical stores and doctors. Furthermore, we provide medical tourism services across the region by establishing partnerships with well-known hospitals and clinics of the region, offering facilities such as cost comparison of treatment, appointments, translation and interpretation in local languages and accommodation.

### Electronic health records

A web-based system that allows doctors to better keep track of the health information of the patients and enable them to see it when the patients have a problem even when their office is closed. The system also makes it easier for the doctor to share information with specialists, so that specialists who need the patients' information have it available as and when required.

### e-Prescription

Traditionally, healthcare professionals had to prescribe patient's medication either by writing a script, calling in a prescription to patient's pharmacy. The use of scripts is often prone to prescription errors that can have life threatening consequences. Healthcare professionals have been known to have difficulty to read handwriting that pharmacists cannot decipher. This causes a pharmacist to either fill a prescription incorrectly or not fill the prescription at all. If the physician is not readily available to confirm the prescription, the patient may have to wait a day or longer for a critical prescription.

Electronic prescribing is in essence, the writing of prescriptions with the assistance of computers. This could mean that the individual is using a hand-held PDA and touch screen to input/write the prescription, or alternatively it could be typed in using a laptop or even a full-sized computer. Electronic prescribing can also be referred to as a means of sending prescriptions electronically from a doctor to a pharmacy. While almost any computer can be successful in running the electronic prescribing system, touch screen hand held electronics have been the focus of many of the programs.

### Telemedicine

We provide custom telemedicine apps, software solutions and telemedicine software development services for healthcare providers. We ensure our solutions are interoperable, compliant, and programmed with data encryption for web and mobile systems.

Our services include:

- Telemedicine Software and Solutions
- Video Conferencing Systems and Solutions
- Medical Devices Integration
- Laboratory Information Systems
- Pharmacy Management Systems
- Health Information Exchange Systems

# Medical Tourism
